

# CRANBERRY PLUS HOROPITO 350mg (60 CAPS)

## For Maximum Urinary Comfort

Cranberries are used traditionally to support urinary tract health. Pacran® is high potency cranberry that is a patented form of the whole cranberry fruit. Unlike other cranberry extracts, Pacran® includes all parts of the fruit, providing maximum benefits for those seeking support for urinary health. Kolorex® Horopito is a powerful ancient herb that is scientifically validated to support health yeast balance. Together, the dual action of these ingredients provides a broader spectrum of support than Cranberry alone.

### PRODUCT INFORMATION

#### Ingredients per vegetarian capsule:

Cranberry ( <i>Vaccinium macrocarpon</i> ) powder equiv fresh fruit	25g
Horopito ( <i>Pseudowintera colorata</i> ) powder	120mg

#### Other ingredients:

Contains encapsulating aids.  
No added gluten, dairy, artificial colours or preservatives

- World-first combination of ingredients
- Dual action provides broader spectrum support compared to Cranberry alone
- Cranberry is well known for urinary health; Horopito supports women who's urinary problems are caused by yeasts and fungi
- Horopito is backed by years of research showing anti-fungal activity
- High strength: each capsule contains 25,000 mg Cranberry fresh fruit equivalent
- Pacran is the most studied and proven cranberry product on the market today
- Pacran is backed by several clinical studies showing it reduces both the incidence of, and recurrence of, urinary tract infections

The combination of Pacran® and Kolorex® Horopito provides a world-first solution for urinary tract health, harnessing the power of not one, but two scientifically studied ingredients for urinary comfort.

Each bottle contains 60 vegetarian capsules.

## Sustainable Farming of Kolorex Horopito

Building on traditional usage and the University of Canterbury discovery, Forest Herbs Research sampled wild-growing Horopito. They discovered a 5 times variation between populations in effectiveness against *Candida albicans*. Forest Herbs Research then spent years learning how to domesticate and sustainably harvest these slow growing shrubs, eventually planting two farms in the variety that is most powerful against *Candida albicans*. These are known as Kolorex Horopito.

Horopito leaves contain such good defences against fungi and predators the plant has been able to survive largely unchanged for 65 million years. It is one of the world's oldest flowering plants. However its age means it has a very primitive vascular (water transporting) system so it dies quickly if the ground is dry. Forest Herb's solution was to site both its farms next to the temperate rainforests of the Kahurangi National Park.

**Also available as a cream for foot and genital fungus:**

## HOROPITO DOES NOT CONTAIN:

- Gluten/ Wheat
- Dairy products / casein
- Soya
- Corn
- Yeast
- Artificial flavours/colours
- Preservatives
- Tree nuts/peanuts
