

PARAFORM

150 ml tincture

PARASITE CLEANSE FORMULA

According to the Centre of Disease Control and Prevention "A parasite is an organism that lives on or in a host organism and gets its food from or at the expense of its host. There are three main classes of parasites that can cause disease in humans: protozoa, helminths, and ectoparasites".

It is estimated that at least 85% of the world's population has some kind of parasite living inside them, a parasite being an organism that lives and feeds off of other organisms (people, animals), stealing nutrients and causing harm in the process.

PARAFORM contain 5 active ingredients that would serve as wonderful accompaniments to our parasite cleanse formula.

PRODUCT INFORMATION

Ingredients:

Green black walnut hull (*Juglans nigra*), Clove flower (*syzigium aromaticum*), cramp bark (*Viburnum opulus*), thyme leaf (*thymus vulgaris*), fennel seed (*foeniculum vulgare*)

Directions:

Take 35 drops x 3 times daily in a little water, away from food.

Do not exceed the recommended daily intake.

Food supplements should not be used as a substitute for a varied diet and healthy lifestyle.

Do not take if pregnant or breast feeding.

** This statement has not been evaluated by the EFSA. This product is not intended to diagnose, treat, cure or prevent any disease.*

ABOUT THE INGREDIENTS

✓ **Green black walnut hull (*Juglans nigra*):** Used internally for the treatment of worms/parasites, yeast infections. The bark is a powerful purgative. One of the key active components of the black walnut hull is juglone. Juglone exerts its effect by inhibiting certain enzymes needed for metabolic function. Its natural laxative effect may help flush intestinal parasites out and prevent constipation. Black walnut oxygenates the blood to kill parasites. The brown strain found in the green black walnut hulls contains organic iodine which has antiseptic and healing properties.

✓ **Clove flower (*Syzygium aromaticum*):** Clove is a powerful local antiseptic. Cloves possess natural analgesic, antispasmodic and antibacterial properties. The active substance called eugenol prevents blood clots and other cardiac and circulatory problems. Cloves have been traditionally used to harmonize digestive function, calm the stomach, promote bowel movement and reduce gas and mucus.

✓ **Cramp bark (*Viburnum opulus*):** The components of Cramp Bark (Vitamin K, viburnin, isovalerianic acid, hydroquinines, coumarins, salicin, salicosides, arbutin, sterol, tannin, and resin) greatly calm gastrointestinal cramping by relaxing the smooth muscles. It also helps with general muscle cramping; reducing any cramping that might occur while the colon is working to expel parasites.

✓ **Thyme leaf (*Thymus vulgaris*):** Thyme contains flavonoids that are most commonly known for their antioxidant activity, and thymol and carvacrol, which are effective in killing bacteria, fungal infections, and yeast infections. Thyme is especially effective in killing hook-worms, roundworms, threadworms and skin parasites. Thyme also destroys *Cryptococcus neoformans*, *Aspergillus*, *Saprolegnia*, *Salmonella typhimurium*, *Staphylococcus aureus*, and *Escherichia coli*.

✓ **Fennel seed (*Foeniculum vulgare*):** Fennel seeds contain essential oils such as anethole, which has been found to have powerful antimicrobial properties, proving effective against *salmonella enterica*, a variation of the dangerous salmonella bacterium.
